

FAXCOM *Anywhere* Offerings

Biscom's FAXCOM *Anywhere* service provides fax-to-email and email-to-fax services for personal, office and enterprise users. The FAXCOM *Anywhere* service is a next generation fax-to-email hosted service. It offers the features and functionality of an enterprise-class fax server solution, but without the expense of server hardware or support personnel. Email users send and receive faxes by connecting via the Internet to a remote FAXCOM *Anywhere* facility. FAXCOM *Anywhere* services enable all the members of an organization, from small office to large enterprises, to send and receive faxes at their personal workstations.

FAXCOM *Anywhere* Office: For small offices and workgroups

FAXCOM *Anywhere* Office is designed for small businesses and professional groups that need centrally managed personal accounts. All charges are presented on a single monthly bill. You can set up new users, assign phone numbers and manage accounts via a convenient Web browser-based interface. There is no software to install. Everything works through email and the Web.

FAXCOM *Anywhere* Enterprise: For organizations with an IT department

FAXCOM *Anywhere* Enterprise provides all the benefits of a high-performance enterprise fax server, without having to install one. Just download the FAXCOM *Anywhere* Enterprise software and install it as a service on any Windows 2000 or 2003 server. This software integrates with LDAP or Active Directory to enable an administrator to assign user's rights to access fax services, assign phone numbers, and set up queues by department.

FAXCOM *Anywhere* Enterprise also works with Group Policy and provides tight integration with Exchange, Outlook, SMTP, Windows desktops and the Web. The Web component can be integrated with your own corporate portal, rather than using the FAXCOM *Anywhere* website.

FAXCOM *Anywhere* Enterprise includes a Software Developers Kit (SDK) that enables programmers to integrate with in-house applications.

Growth Path

FAXCOM *Anywhere* is the industry's only fax solution that provides a complete spectrum of options for users and a built-in growth and migration path. An organization can start with a few fax users, upgrade to FAXCOM *Anywhere* Office or FAXCOM *Anywhere* Enterprise, and eventually migrate to a FAXCOM Server, all in a time frame that makes sense.

FAXCOM *Anywhere* is the only solution that credits a portion of your payments to a future higher service upgrade, or to a purchase of a FAXCOM Server.

Features & Benefits

Fax-to-email: Faxes arrive as PDF files directly into your email

Email-to-fax: Send faxes as easily as you send email today

No software training required: Easy to use

Eliminate fax machines: Cost effective: no paper, toner or phone lines

Send and receive faxes as email attachments: Automatic conversion of multiple email attachments to fax

Web-based: Sending and receiving faxes from anywhere

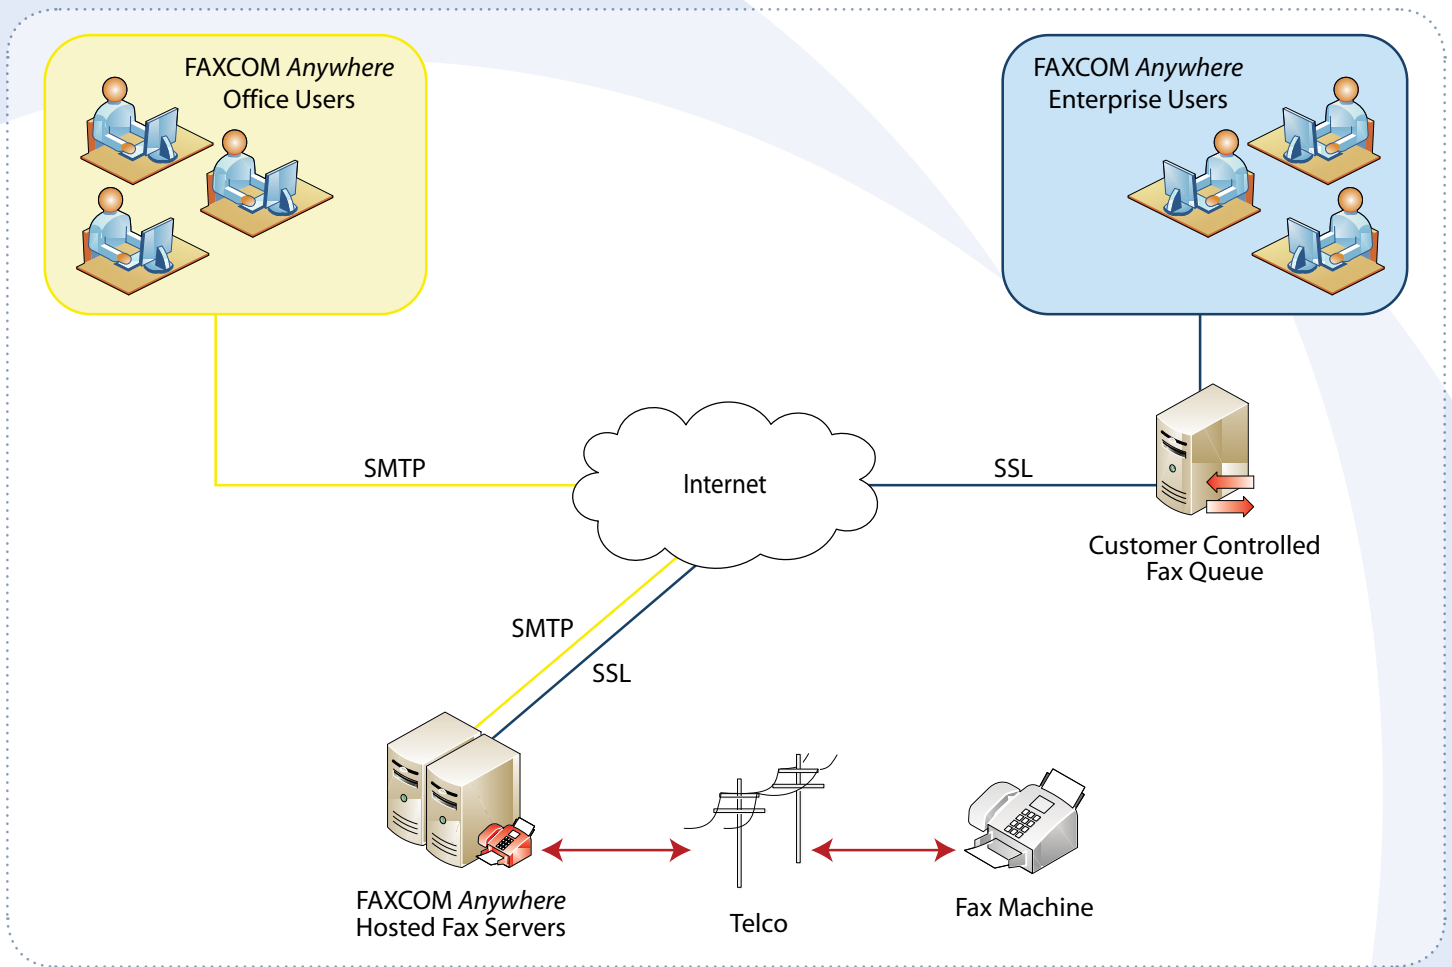

Automatic retries: Unattended operation

Email notification of incoming faxes: Users know immediately when a fax has arrived

Virtual fax server: Uses email or SSL - no fax server hardware setup required

Simple migration path: User interface stays the same when upgrading

Searchable PDF: Easily locate documents with full text search

FAXCOM Servers - Customer Premise Solution

For organizations with in-house telephony and IT resources, FAXCOM Servers provide a robust, on-premise solution. A FAXCOM Server offers a complete hardware and software fax management solution that is installed at a customer's location and uses the customer's own telephony infrastructure for fax transmissions.

About Biscom, Inc.

Biscom was founded in 1986 and pioneered the fax server marketplace, providing many of the world's largest organizations with its award-winning FAXCOM fax servers. In addition to enterprise fax server products, Biscom also offers hosted fax services, secure file transfer and messaging solutions, file conversion software, and document workflow and automation tools. Biscom is headquartered in Chelmsford, Massachusetts.
