

# Legal Industry Solutions

## Secure Document Delivery

Law firms of all sizes are challenged with transferring volumes of increasingly large files to clients, business partners and external counsel. Adding to this challenge is the pressure to insure confidential document exchange complies with federal and state data privacy regulations. Biscom Secure File Transfer (SFT) is an advanced secure file transfer solution that is specifically designed to meet the demanding secure file exchange requirements of today's complex legal environment.

### Reduce Costs and Help Meet Compliance for Legal Document Exchange

#### Security Policy Auditing and Compliance

- Protects your firm from costly and damaging data breaches by encrypting data in transit and at rest
- Reduces the risk of unintended data breaches caused by unsecure e-mail or FTP sites
- Strong transaction tracking and reporting supports e-discovery, data breach monitoring and compliance with federal and state personal data privacy regulations

#### Litigation and Practice Support

- Eliminates the overhead of administering FTP sites, along with the risk of unauthorized external party access to confidential documents
- Reduces cost, delay and potential data breaches associated with delivery of confidential data via courier or overnight delivery
- Dramatically simplifies the process of high volume document transfer to support complex litigation

#### Attorney Communications

- Outlook add-in allows attorneys to send attachments of any size from the familiar Outlook e-mail environment
- Provides attorneys and paralegals the option to route confidential e-mails securely through SFT
- Notifies attorneys when the recipient accesses a secure delivery and downloads files
- Intuitive user interface will accelerate user adoption and discourage use of unsanctioned alternatives such as personal e-mail and unsecure hosting sources

### Why Choose Biscom SFT?

- Protect your firm's reputation with advanced security of confidential data transfers
- Replace expensive and inefficient file transfer methods:
- Insure non-repudiation of delivery with real time notification of receipt
- Facilitate secure collaboration by enabling clients and outside counsel to reply securely
- Meet regulatory compliance and support security auditing with precise transaction tracking
- Promote user adoption with an intuitive user interface and discourage the use of unsanctioned file transfer methods
- Integrate Biscom with Outlook to enable attorneys and staff to send confidential emails and attachments securely
- Reduce the cost of email operations by offloading large attachments
- Eliminate the cost and overhead of administering FTP sites
- Reduce dependence on costly overnight delivery and CD burning
- Increase attorney billable time and staff productivity

#### About Biscom

Biscom, headquartered in Chelmsford, Massachusetts, pioneered the development of the first enterprise fax server. Since 1986, Biscom has provided the most scalable and reliable secure document delivery and file sharing solutions to the world's largest enterprises.
