

# Biscom Enterprise Fax for HP Workpath MFPs

## ENABLING SECURE FAXING TO STREAMLINE WORKFLOWS

### KEY BENEFITS

- Scan multiple documents and send as a single fax
- Enter multiple recipients' fax numbers and names
- Edit cover page, subject, and memo
- Preview the fax on the HP MFP console before sending
- Limit delivery to authorized recipients to protect confidential information
- View, print, & resend both received and sent faxes from the MFP console
- Hybrid configuration provides high availability and peak load processing using a mix of cloud and on-premises deployments
- Monitor and manage fax traffic, fax groups, servers, and users to address issues before they disrupt processes
- See a complete view of your fax environment and set custom alarms
- Permanent access, print and archiving of sent fax delivery status from the HP MFP console
- Eliminate the need for a fax card and phone line
- Support for all Biscom deployment options

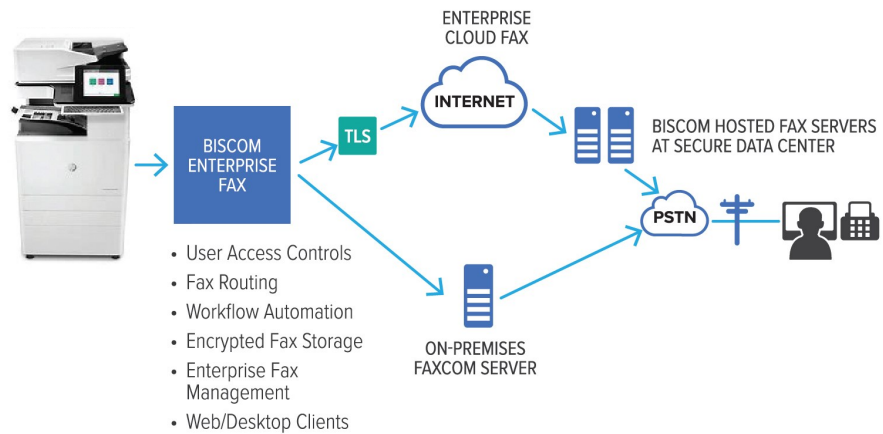

### OVERVIEW

Biscom's Enterprise Fax solutions are streamlined, integrated systems that support the most advanced enterprise faxing needs. The Biscom Enterprise Fax App is integrated with FAXCOM® on-premises servers and cloud fax services to enable the delivery and receipt of faxes from HP Workpath MFPs.

### BISCOM ENTERPRISE FAX DEPLOYMENT OPTIONS

The Biscom Office Cloud Service supports:

- Faxing electronic documents from email or web interface
- Faxing scanned documents from HP Workpath MFPs
- Routing inbound faxes to an email or group of emails

The Biscom Enterprise Cloud Fax Service and FAXCOM On-Premises servers supports:

- Faxing to/from multiple destinations, including email, desktop/web clients, SharePoint, file shares, applications, and HP Workpath MFPs
- Intelligent fax routing and workflow automation
- Active Directory integration
- Encrypted fax receipt/storage and controlled access to support regulatory compliance
