### OVERVIEW

The nation's largest healthcare providers, insurers, and labs including Massachusetts General Hospital, the Mayo Clinic, the National Institutes of Health, and Medicaid all depend on Biscom's Enterprise Fax solutions to send and share confidential information and PHI. Biscom's advanced electronic fax technology helps organizations achieve HIPAA compliance, keeps transmitted data secure, streamlines workflows, reduces manual errors, and increases productivity. The Biscom Enterprise Fax App for HP JetAdvantage allows clinicians to perform all fax related activities from the convenience of the HP JetAdvantage console, improving clinician productivity and facilitating patient care.

### BISCOM ENTERPRISE FAX DEPLOYMENT OPTIONS

The Biscom Enterprise Cloud Fax Service and FAXCOM On-Premises servers supports:

- Faxing to/from multiple destinations, including email, desktop, web clients, SharePoint, file shares, applications, and HP JetAdvantage MFPs.
- Encrypted fax receipt/storage and controlled access to support regulatory compliance.
- Intelligent fax routing and workflow automation to improve patient care and staff productivity.
- Enterprise Fax Management lets you monitor and manage fax traffic, fax groups, servers, and users to address issues before they disrupt processes. See a complete view of your fax environment and set custom alarms.
- Hybrid configuration to provide high availability and peak load processing using a mix of cloud and on-premises deployments
