

FAX FROM WITHIN CENTRICITY

Integrated Fax for GE Centricity EMR

FAXCOM CV is a robust, entry-level, two-line fax solution that is fully integrated with GE Centricity EMR. Our solution allows medical offices and clinics to take advantage of many of the powerful features of Biscom's enterprise fax solutions.

- Fax prescriptions, letters, and documents - anything that can be printed
- Select fax recipients from the Centricity Physician Office EMR Contacts list
- Imports completion status and saves the fax into patient's chart
- Notifies senders or administrators of failed faxes
- Supports Medicare "meaningful use" of Electronic Medical Records (EMR)
- Provides the full audit trail you need for HIPAA compliance

Take Advantage of Enterprise-Level Features

Biscom has built a large installed base of fax servers at major hospitals, Fortune 500 companies, government agencies, and other organizations across a wide range of industries. Large organizations in highly regulated industries with mission-critical, high-volume, sophisticated faxing requirements have chosen Biscom to meet these needs.

As a fax solution designed expressly for small offices, FAXCOM CV includes many of the same features developed for large, multi-site companies and healthcare organizations who insist on superior reliability and performance. Moreover, FAXCOM CV was designed to enable offices without a dedicated technical staff to get their fax capabilities quickly up-and-running.

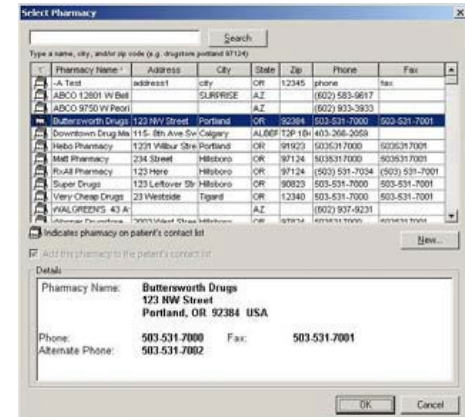

Everything You Need for a Full-Featured Fax Solution

The FAXCOM CV package includes the following components:

- Two-channel analog fax board for telephone lines
- Complete installation and user documentation
- The FAXCOM CV software which includes the following:
 - FAXCOM Server Software - interface with the fax board to send faxes
 - FAXCOM Queue Service - connect to GE Centricity EMR
 - FAXCOM Administrator Application - configure and manage services
 - Cover Page Editor - create system-wide and user-specific fax cover pages
 - FAXCOM Client Application - desktop application to send faxes outside of Centricity

Biscom Knows Centricity (and Faxing)

Biscom has worked closely with GE and EMR users to natively-integrate our FAXCOM enterprise fax solution into Centricity. Biscom is the only vendor trusted by GE to be directly integrated with their industry leading Centricity EMR solution. This isn't surprising as Biscom has been developing enterprise fax solutions for over 30 years. That's why leading medical organizations including Children's Hospital, Dana-Farber Cancer Institute, and Mass General Hospital depend on Biscom.
