

# Biscom Digital Fax for HP JetAdvantage

## ENABLING HIGH RESOLUTION DOCUMENT DELIVERY TO ENHANCE USER PRODUCTIVITY

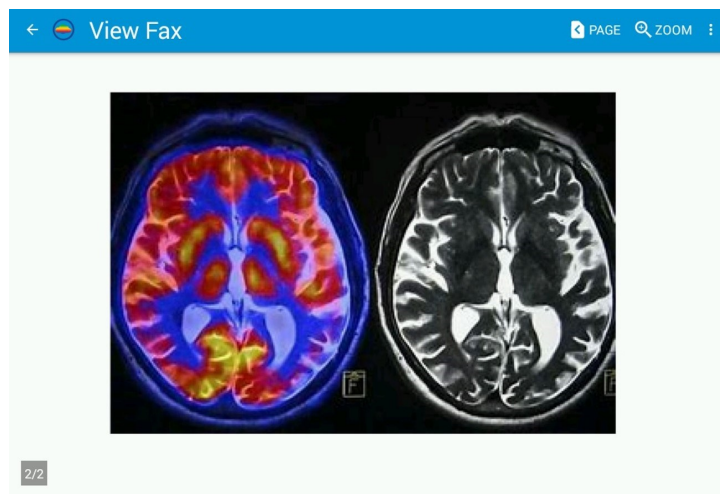

### KEY BENEFITS

- Cloud-based solution that takes full advantage of available bandwidth speed
- Eliminate need for fax cards and phone lines
- Receive digital faxes automatically to HP JetAdvantage MFPs
- No color fax machine needed
- Secured by encryption and uses credential checking
- No file size limitation
- Applications for web, Windows, Apple, and Android
- Can transmit HL-7 metadata with images

### OVERVIEW

Biscom's Digital Fax enables users to send and receive high resolution and color documents over the internet at high speeds without the need for color fax machines or phone lines. The Digital Fax App for HP JetAdvantage delivers scanned documents that require higher resolution than standard faxes. Inbound documents can be delivered directly to a JetAdvantage MFP for color printing. Running directly on the MFP, the app makes users more productive and protects confidentiality by managing the scanning, sending, receiving, processing and printing of documents directly on an MFP device without the need to use a computer.

### USE CASES

**Healthcare:** Send high quality diagnostic imaging reports directly to physicians offices. Exchange images of radiographs and MRI imaging among specialists and general practitioners. Great for receiving medical records directly from an electronic health records system.

**Financial Services:** Send clear copies of color or high-resolution documents such as drivers licenses, passports, stock certificates securely with a credit application or transaction.

**Design:** Securely send high quality proofs of design concepts, architectural drawings, etc.

### BISCOM DIGITAL FAX DEPLOYMENT

Biscom hosts the infrastructure required to support Biscom Digital Fax in the cloud. Users connect using a web interface for transfer of digital documents and the Biscom Digital Fax app for transferring physical documents scanned at the HP JetAdvantage MFP.
